DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of specie III (figures 12-21, claims 1-3, 6 and 9-15) in the reply filed on 11/13/2006 is acknowledged. Claim 9 is also withdrawn because the limitation is not shown in the elected specie figures.

Specification

2. The disclosure is objected to because of the following informalities:
 - a) The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.Appropriate correction is required.

Claim Objections

3. Claims 2 and 3 are objected to because of the following informalities:
 - a) The limitations of claims 2 and 3 are already in claim 1.Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2839

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 6 and 10-15 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2849897 (cited in IDS).

JP 2849897 discloses, **for claim 1**, first (3) and second (2) connectors each including connector terminals which are coupled with each other by coupling the first and second connectors with each other, characterized in that a rear holder (4) for preventing the connector terminals installed in the first connector from being withdrawn backwardly is engaged with a rear portion of a housing main body of the first connector, and that said rear holder includes a locking arm (23) having a free end extending forwardly and a locking claw provided on said locking arm for locking the rear holder with the second connector (see figures 3 and 6), **for claim 2**, said locking arm is locked with a housing main body provided in the second connector, **for claim 3**, said locking arm is locked with a rear holder secured to a housing main body provided in the second connector, **for claim 6**, said rear holder includes clamping lances for clamping said connection terminals within the housing main body of said first connector (see figures 3 and 6), **for claim 10**, said locking claw is provided at a middle portion of the locking arm (somewhere in middle), **for claim 11**, said free end of the locking arm is supported by a part of the housing main body of the first connector, **for claim 12**, a lower portion of the free end of the locking arm is supported, **for claim 13**, a side of the free end of the locking arm is supported, **for claim 14**, an engaging portion which is engaged with a part of the housing main body of the first connector is provided on the side of the locking arm, **for claim 15**, a plurality of said locking arms are provided.
